## General Comment

Clearly, our community depends on clean water for our health, livelihoods and economic security.

Unfortunately, pollution is killing the Chesapeake and hundreds of other rivers and creeks in the region. All this pollution gets collected into the bay, which is no better shape today than it was 25 years ago.

You now have the unique opportunity to do something about it, and the time has come to put strong, enforceable water safety standards in place to protect our homes, support our economy and ensure that our streams and rivers are healthy today and for our children's future.

I urge you to develop a strong pollution diet in my state that holds us all accountable for the pollution that is harming our wildlife and damaging our local economy. It is imperative that these plans address all sources of pollution and demonstrates how reductions will be gained. Citizens across this state and the region need your help to keep our water clean and protected.

Please started using the education and knowledge that we have as a society to stop pollution now .This should not even be an issue anymore we should have learned our lesson years ago.I urge you to start taking care of this problem and save our wildlife so generations to come can enjoy this special gift.Let us be the generation who cares and puts an end to pollution of all kinds.Let this be our legacy
